

ADNAN ABDU RAHMAN

AI SOLUTIONS & FULL-STACK ENGINEER

Dubai, UAE | +971 54 768 2494 | hello@adnanabdurahman.com
adnanabdurahman.com | linkedin.com/in/adnanabdurahman | github.com/adnanabdurahman

SUMMARY

Full-stack and technology professional with experience across application development, ERP/business systems, web platforms, APIs, IT systems and digital operations. Experienced in building and maintaining production applications and translating business requirements into practical technical solutions. Currently expanding deeper into AI-powered applications, workflow automation, system integration and cloud engineering.

TECHNICAL SKILLS

Software Engineering	JavaScript, TypeScript, React, Next.js, Node.js, Express, REST APIs
AI & Automation	AI-assisted development (Claude Code, ChatGPT), AI integration, workflow automation
Data	MongoDB, Supabase, MySQL, MariaDB, SQL
ERP & Business Systems	Odoo (Sales, CRM, Inventory, Purchase, Projects), Python, business workflow configuration
Web & CMS	WordPress, WooCommerce, Elementor, technical SEO
Infrastructure & Tools	Git, GitHub, Linux, Nginx, DNS, Microsoft 365, Hostinger deployment, Docker basics

EXPERIENCE

Infinity Developments

July 2026 - Present

Full-Stack Website Developer | Dubai, UAE

- Build and maintain the group's web platforms using Next.js, React and WordPress across real estate, hospitality and corporate brand sites.
- Implement technical SEO, structured data and analytics tracking (GA4, Google Search Console) to improve organic visibility across the group's digital properties.
- Develop and maintain an internal marketing task and workflow platform used by the marketing team to plan, track and collaborate on projects.
- Use AI-assisted development workflows (Claude Code, ChatGPT) to ship features faster without lowering code quality.
- Support email marketing and content operations connected directly to the sites and systems already in production.

Stranbys Technologies

2024 - June 2026

Web Developer - ERP / Odoo & IT Systems | Remote

- Configured and maintained Odoo ERP modules (Sales, CRM, Inventory, Purchase, Projects) to match real business workflows.
- Built and maintained the company website alongside ongoing IT systems and infrastructure support.
- Translated operational requirements into ERP workflows and business-system configuration, working with Python and PostgreSQL.

Futura Labs

Nov 2023 - May 2024

Web Developer - Internship | Kozhikode, Kerala, India

- Worked on full-stack web development using the MERN ecosystem (MongoDB, Express, React, Node.js), gaining practical experience building frontend interfaces, backend functionality, APIs and database-driven web applications.
- Built the foundation of my full-stack engineering experience across the full web development lifecycle.

SELECTED PROJECTS

Tutorzz - Learning Management Platform

[React](#) | [Node.js](#) | [Express](#) | [MongoDB](#) | [Stripe](#) | [Zoom API](#)

Full-stack LMS with dedicated student, instructor and admin dashboards, live class scheduling and payments.

Marketing Task & Workflow Platform

[Next.js](#) | [React](#) | [TypeScript](#) | [Node.js](#)

Internal application for a marketing team to plan, track and collaborate on tasks across projects.

JTRS

[Odoo](#)

Website and systems for an Apple Premier Partner and multi-vendor IT reseller in the UAE.

Full case studies with live links: adnanabdurahman.com/work

NH Collection 3D Resort Explorer

[React](#) | [Three.js](#) | [WebGL](#)

Interactive 3D/2.5D browser application for exploring a resort masterplan in real time, not a static site.

Stranbys Technologies

[WordPress](#) | [Odoo](#) | [Python](#) | [PostgreSQL](#)

Company website plus Odoo ERP configuration across core business modules.

GEMS International School Zanzibar

[Next.js](#) | [React](#)

Admissions-focused digital platform built around the enquiry-to-enrolment journey.

EDUCATION

Kannur University

2020 - 2023

Bachelor of Computer Applications (BCA) - coursework in software development, databases and web technologies.
